Business/Non-Instructional Operations

Security (Buildings and Grounds)

Buildings and grounds of the school district constitute one of the greatest investments of the school district. It is in the best interest of the district to protect that investment.

Security means not only maintenance of a secure (locked) building, but protection from fire hazards and faulty equipment, and safe practices in the use of electrical, plumbing, and heating equipment. The Board of Education requires and encourages close cooperation with local police and fire departments and with insurance company inspectors.

Adequate key control systems shall be established to limit building access to authorized personnel and to safeguard against entrance by keys in the hands of unauthorized persons.

Funds and valuable records shall be kept in safe places and under lock and key.

The Superintendent of Schools or his/her designee shall assure that adequate security personnel are assigned when needed.

Legal Reference: Connecticut General Statutes

29-389 Stairways and fire escapes on certain buildings.

Policy adopted: March 18, 2004
