Health Assessments and Immunizations

The Board of Education adheres to State laws and regulations that pertain to school immunization and health assessments. Pupils who are in violation of requirements for health assessment and/or immunizations shall be excluded from school after appropriate parental notice. The exceptions to this exclusion rule are students who meet the Federal definition of homeless.

The health assessments shall be required prior to enrollment to kindergarten and during grades 6 and 10. The prior enrollment requirement also applies to children registered in Waterford Public Schools Pre-Kindergarten (Pre-K) Program. A qualified physician/designee, which include an advanced practice nurse (APRN) or registered nurse or physicians assistant when licensed to do so, is to administer an appropriate health assessment within 12 months of the date of initial enrollment to be considered valid. In order for a medical assessment to be considered valid for those students enrolled in 6th and 10th grades the examination must be completed within the school year or during the summer prior to the school year (no sooner than July 1st). Students transferring into Waterford from both out of state and in state schools systems must also meet minimum requirements for health assessment and immunization.

No record of any student's medical assessment may be open to the public.

Exemptions from this requirement on the basis of medical or religious reasons can be obtained if parent or guardian provides written notice on appropriate District forms. Medical exemptions must include physician written statement of contraindication according to State law.

As required, beginning school year 2003-2004, the district will annually report to the Department of Public Health and to the local health director the asthma data obtained through the required asthma assessments, including student demographics. The district, as required, will also participate in annual school surveys conducted by the Department of Public Health pertaining to asthma.
